Deploying LED Streetlighting has become a very complicated process, involving many considerations and different players to effectively execute. In order to properly assess the value LED Streetlighting can offer, a utility, city, or operator must understand its benefits such as; energy savings, maintenance, longer life, and performance.

This course provides an overview of the current LED streetlighting technology, standards, and best practices. The course will explain an in-depth methodology to understanding the advantages and disadvantages of LEDs, as well as the costs involved and deployment strategies. If you are interested in the capabilities and return on investment of LED streetlights, as an owner, operator, or investor, this is the course for you!

EUCI is authorized by IACET to offer 1.0 CEUs for the course

# ONLINE DELIVERY & PARTICIPATION DETAILS

EUCI will use Microsoft Teams to facilitate participation in the upcoming event. Attendees do not need to have an existing Teams account to participate in the broadcast. The course will play in attendee's browser. When attendees sign on, their microphones are typically muted. Attendees should keep their mic muted until such time as it's needed to ask a question. During the event, participants will have the option of using a microphone to speak with the room and ask questions, or type in any questions via the chat window and our online administrator will relay your question to the instructor.

- Each attendee will receive an event invitation by e-mail, which will include one link to sign on for each half-day of the event (i.e., three links for a 1 1/2 day event). The appropriate link must be used to join each half-day event segment at the appropriate time.
- The remote meeting connection will open approximately 30 minutes before the start of the course. We encourage attendees to connect as early as possible in case of unforeseen problems.
