"This class was well thought out and put together with a lot of detailed information to help understand more about substations. I would highly recommend this class to all who seek further education on the basics of substation design and operations."

This course will introduce and provide non technical people with the basics of a substation and all the general components that are inside a substation. General issues that are involved in the construction, operation and maintenance of substations and switchyards, and detailed safety awareness will be discussed. It will allow people who are not substation design engineers to know enough to oversee various aspects of a substation and will allow strong oversight of contractors and various substation projects.

LEARNING OUTCOMES

- Review the basics of the power system
- Explore an in-depth section on substations covering their types and differences
- Describe the various components and all equipment in substations
- Review possible causes and solutions to substation faults
- Explain the various factors in and parts to substation safety
- Engage in an understanding of basic substation drawings and diagrams
- List the components and tasks involved with managing a substation project

INSTRUCTORS

- **Anthony Centore, PE**, Director of Engineering Services, Pike Engineering
- **Jerry Josken**, Senior Consultant, Pike Engineering

EUCI will use Microsoft Teams to facilitate participation in the upcoming event. Attendees do not need to have an existing Teams account to participate in the broadcast. The course will play in attendee's browser. When attendees sign on, their microphones are typically muted. Attendees should keep their mic muted until such time as it's needed to ask a question. During the event, participants will have the option of using a microphone to speak with the room and ask questions, or type in any questions via the chat window and our online administrator will relay your question to the instructor.

- Each attendee will receive an event invitation by e-mail, which will include one link to sign on for each half-day of the event (i.e., three links for a 1 ½ day event). The appropriate link must be used to join each half-day event segment at the appropriate time.
- The remote meeting connection will open approximately 30 minutes before the start of the course. We encourage attendees to connect as early as possible in case of unforeseen problems.
