Recent developments in NYISO reflect significant divergences from long-run trends that create complexity and challenge paradigms. As the market changes, some participants will see margins eroded and business models strained.

This workshop will examine the key trends that have upended market dynamics in the New York wholesale electricity market (NYISO), and whose future disposition will define market participant winners and losers going forward.

EUCI is authorized by IACET to offer 0.3 CEUs for the course. Participants must log on each day and be in attendance for the entirety of the course to be eligible for continuing education credit.

LEARNING OUTCOMES

- Assess market rule changes designed to address tensions between competitive markets and state policy objectives
- Evaluate state mandates to de-carbonize the electric grid
- Examine COVID-19 impacts on NYISO operations and market
- Explore what's next for NYISO market adjustments and outcomes
